

COLLINS YOULDON NOZZLE & BONDING REEL

Road Tanker Ancillary Equipment

1½" Fuel Oil Delivery Nozzle

The nozzle weighs only 1.7kg (excluding spout) and is opened and closed with a simple lever. High delivery rates are achieved through the large bore ball valve.

The body and ball valve are aluminium, seals are Viton and the ball valve seats are PTFE and nylon for durability.

It must be stressed that nozzles must not be dragged along the ground when rewinding the hose.

Compact Bonding Reel

The compact unit is supplied complete with a 4" copper earthing clip and 15m of 7x7 galvanised steel cable with yellow vinyl coating. Supplied with a rewind handle. The drum is aluminium and the stand is zinc plated mild steel.
