

## AS Beam Gantries

Offering Standard Gantries & New Beams to the Fire & Rescue, Security, Police & Commercial Sectors

With a huge range of Manually Operated Beam Gantries to all sectors, renowned for delivering excellence to all, the choice is clear when wanting to safely operate high level equipment from vehicles.

National & International leader in supplying Beam Gantries to the Fire & Rescue Market for the Stowage/deployment of Rescue Ladders. Our Beam gantries are designed as standard to suit all AS & Bayley type ladders.

Our Beams are also supplied Internationally to Vehicle manufacturers who use alternative rescue ladders and are also suited to accommodate other equipment such as Suction Hoses and Ancillary equipment.

Our flexibility also allows us to supply to other important sectors.

### Construction:

Engineered using the best all-round High Tensile alloys and Superior Plating Processes. Also paint finished to a High end Powder coat. Supplied as standard in white, Optional finishes in Yellow & Silver.

We also currently offer a New Improved Hydraulic Damper pivot with adjustable stops, sold as a kit To replace if required the Friction damper pivot currently out in the market.

Please contact our Technical Sales team for further information on this.
